Natural History of the Southwest, Ecol 230 is a Tier II NATS course that presents an overview of the natural world of the place we live. It can also be used to satisfy the Additional Physical Science requirement for EEB majors.

Many people have been drawn to southern Arizona because it is a natural wonderland of rare beauty and interest.

We introduce you to basic principles of ecology and evolution illustrated with the plants and animals of our unique region.

Learn about deserts, mountains and sea and meet bobcats, saguaros, Gila monsters and ringtails. Natural History of the Southwest is a lecture course which includes live animal demonstrations in class and local field trips.

Meets T-TH 11:00 - 12:15 PM in Marley Building, Room 230
Grading: Regular grades are awarded for this course: A B C D E
