Creation Date:	January 10, 2020

Academic Support Plans - College Default Values:

Advising Directors/Coordinators in each college will have the ability to set default values for the Academic Support Plans for the college at Main Menu > Academic Advisement > Student Advisement > Academic Support Plan Defaults.

When setting college defaults, you will want to set up default values for both "Academic Warning" (ADW) and "Academic Probation" (ADP). Default values are based on the student's program (college), academic action (Academic Warning, Academic Probation, Eligible, Ineligible, and Academic Review), and Campus. Different values can automatically populate the Academic Support Plan if defaults are set. Previously establish defaults can be maintained and updated using the "Find an Existing Value" tab. For the Spring 2020 semester, all new defaults will need to be created since the conditions and academic action values have changed significantly.

Creating Academic Support Plan College Default Values:

Add a new value indicating the Academic Program, Academic Eligibility Status, and Campus for which you want to create defaults.

Academic Support Plan Defaults

When an advisor creates an Academic Support Plan for a program (college) that has default values, those values will automatically populate the Academic Support Plan. The advisor may delete or modify those default stipulations if they desire.

Academic Plan and Course Plan cannot be set to display default values. This is because those items are highly variable between students. The Advisor Additional Stipulation section also does not appear because that functionality is mimicked by the College Stipulation box; this also allows for differentiation between what the college may expect of the student and what the student's advisor expects.

Student Administration Instruction Document

The importance of the college default values is that they allow colleges to put stipulations on the Academic Support Plans for students in their college without having to manually input each stipulation on each student. These college default values (if any exist) will appear on auto-generated Academic Support Plans. Based on the defaults, the following Academic Support Plan was auto-generated for the student in Student Center:

Name Philip Bryden ID 23555105 Academic Career Undergraduate Creation Date 01/08/2020
